

```
// Thanks, Connor Cunningham!!
```

```
public void processInput(SerializableObject obj) {  
    Class<?> cls = obj.getClass();  
  
    ...  
    if (fld.getType() == int.class) {  
        // get field name  
        String methodName = "get" + fieldName;  
        Method getterMethod = cls.getMethod(fieldName);  
        Object invokeRet = getterMethod.invoke(obj);  
        ...  
    }  
}
```
